

# Contents

*Introduction* ..... xxi

**Chapter 1 • Understanding BIM: From the Basics to Advanced Realities** ..... **1**

The Advantages of Building Information Modeling ..... 1  
     A Brief History of Design and Documentation ..... 1  
     Building Information Modeling ..... 2  
 What to Expect from BIM ..... 4  
     Be Creative ..... 4  
     Every Element in Revit Has Properties ..... 6  
     Elements Interact with Other Elements—All the Time ..... 6  
     Duplicating a View Takes Two Clicks ..... 6  
     Problem-Solve Your Designs ..... 7  
     You Create a Full Range of Documents with BIM, Not Just a 3D Model ..... 7  
     Embrace the Family Editor ..... 8  
     Forget About Layers and X-References ..... 9  
     BIM Is More Than a Technology: It's a Change in Process ..... 9  
     Revit Is Relatively New Technology ..... 10  
     Where Can You Go From Here? ..... 10  
 The Bottom Line ..... 12

**Chapter 2 • Revit Fundamentals** ..... **13**

Working with Revit Parametric Elements ..... 13  
     Model Categories ..... 15  
     Annotation Categories ..... 17  
     Subcategories ..... 17  
     Imported Categories/Subcategories ..... 18  
     Views ..... 18  
     Type and Instance Parameters ..... 19  
     Bidirectional Relationships ..... 19  
     Constraints ..... 22  
     Revit Families ..... 23  
     Overriding the Representation of Elements ..... 29  
 The Revit User Interface ..... 30  
     The View Window ..... 30  
     The Design Bar ..... 32  
     The Options Bar ..... 33  
     The Project Browser ..... 33  
 Using the Project Browser ..... 34  
     Views ..... 34  
     Working with Views and View Properties ..... 39  
 The Bottom Line ..... 58

<b>Chapter 3 • Know Your Editing Tools</b> .....	<b>61</b>
Selecting, Changing, and Replacing Elements .....	61
Selection .....	61
Copy/Paste .....	63
Place Similar .....	64
Editing Elements Interactively .....	64
Moving Elements .....	64
Copy .....	67
Rotating and Mirroring Elements .....	67
Arraying Elements .....	70
Resizing Elements .....	71
Aligning Elements .....	72
Trimming and Extending Lines and Walls .....	73
Splitting Lines and Walls .....	74
Offsetting Lines and Walls .....	74
Keeping Elements from Moving .....	75
Other Useful Tools .....	76
Join Geometry .....	76
Split Face and Paint .....	76
Keyboard Shortcuts (Accelerators) .....	78
The Bottom Line .....	79
<b>Chapter 4 • Setting up your templates and Office Standards</b> .....	<b>81</b>
Starting a Project with a Custom Template .....	81
Strategies for Making Templates .....	83
Settings for Graphic Consistency .....	84
Object Styles .....	84
Line Styles .....	85
Line Patterns .....	87
Materials .....	88
Fill Patterns (Hatch) .....	90
Dimension Styles .....	96
Text .....	100
Creating Custom Annotation Tags .....	101
View Tags .....	102
Customizing Element Tags .....	116
Keynotes and Text Notes .....	119
Creating Custom Title Blocks .....	121
Creating a Custom Title Block with the Family Editor .....	122
The Bottom Line .....	125
<b>Chapter 5 • Customizing System Families and Project Settings in Your Template</b> .....	<b>127</b>
Wall Types .....	127
Creating Custom Wall Types .....	128
Floor and Roof Types .....	133
Ceiling Types .....	134

Door and Window Types .....	135
Stair Types .....	135
Properties of Stairs .....	135
Types and Type Catalogs .....	139
Creating Types in the Project Environment .....	140
Creating Types in the Family Editor .....	140
Creating Types with Type Catalogs .....	140
Loading from a Type Catalog .....	142
Graphic Overrides of Host Objects with Complex Structure .....	143
Additional Global Project Settings .....	145
Room and Area Settings .....	145
Units .....	146
Keynote Settings .....	147
Setting Up Default Elements .....	147
The Bottom Line .....	151
<b>Chapter 6 • Modeling Principles in Revit .....</b>	<b>153</b>
Modeling with Revit .....	153
Sketch-Based Design .....	154
Working with Work Planes .....	162
Principles of Modeling in Revit .....	170
Principles of Modeling Techniques .....	172
Solids and Voids .....	196
Where Can You Go From Here? .....	197
The Bottom Line .....	198
<b>Chapter 7 • Concept Massing Studies .....</b>	<b>201</b>
Massing Studies .....	201
Massing Study Workflows .....	203
Massing Tools .....	206
Starting a Conceptual Massing Study .....	208
Putting Theory into Practice: Making a Parametric Mass Family .....	215
Tagging and Scheduling Mass .....	223
Importing 3D Conceptual Models Created in Other Applications .....	224
Rapid Prototyping and 3D Printing .....	225
The Bottom Line .....	227
<b>Chapter 8 • From Conceptual Mass to a Real Building .....</b>	<b>229</b>
Conceptual Design and Early Studies .....	229
Getting Site Data and Building the Context .....	230
Building the 3D Context .....	233
Program Check and Feasibility .....	235
Building Maker .....	238
Massing Best Practices .....	244
Using Imported Geometry from Other Applications for Massing .....	251
Using Smart Relationship between Building Mass and the Underlying Mass .....	255
The Bottom Line .....	257

<b>Chapter 9 • Working with Design Options</b> .....	<b>259</b>
Revit Design Options .....	259
Enabling Design Options .....	260
Design-Option Sets .....	260
Adding Elements to a Design Option .....	261
Editing a Design Option .....	264
Displaying Design Options .....	266
Deciding on a Final Design Solution .....	266
Putting Design Options into Practice .....	268
Showing Quantities and Cost Schedules for Multiple Options .....	272
Working with Rooms and Design Options .....	273
The Bottom Line .....	276
<b>Chapter 10 • Creating Custom 3D Content</b> .....	<b>279</b>
Modeling Parametric 3D Families .....	279
Choosing the Right Family Template .....	280
Types of Families .....	280
Host-Based Families .....	282
Profile Families .....	283
2D Line-Based Families .....	285
3D Line-Based Families .....	285
Work Plane- and Face-Based Families .....	287
Rich Photorealistic Content (RPC) Families .....	288
Detail Component Families .....	289
Generic 3D Families .....	289
Curtain Panel Families .....	290
Family Categories and Parameters .....	291
Smart Workflow: Nesting One Family into Another .....	293
Scheduling Nested Families .....	294
Linking Parameters .....	295
Linking Parameters (Conditional Visibility) .....	296
Parametric Arrays in the Family Editor .....	297
Making the Array Parametric .....	297
Encoding Design Rules .....	298
Example: Using a Formula to Control Dimensions .....	299
Using a Formula to Control an Array .....	300
Building a Parametric 3D Family .....	303
Nesting the Chair .....	303
Creating a Parametric Array .....	304
Controlling Chair Visibility .....	306
The Bottom Line .....	307
<b>Chapter 11 • Extended Modeling Techniques</b> .....	<b>309</b>
Basic Walls: Advanced Modeling Techniques .....	309
Wall Core .....	309
Layer Join Cleanup .....	311
Editing Wall Joins .....	312
Disjoining Walls .....	313

Stacked Walls .....	313
Adding Wall Articulation .....	315
Wall Wrapping .....	319
Sweeps and Reveals .....	319
Creating Custom In-Place Walls .....	324
Curtain Walls: Advanced Design Techniques .....	325
Designing a Curtain Wall .....	326
Curtain Panels .....	330
Curtain Wall Doors and Windows .....	330
Complex Curtain Wall Panels .....	330
Roofs .....	332
Footprint Roofs .....	332
Roof by Extrusion .....	336
In-Place Roofs .....	337
Sloped Glazing .....	338
Sloped Arrows .....	343
Roof Typologies .....	345
Roofs and Slabs: Advanced Shape Editing .....	370
Sloped Roofs .....	371
Warped Surfaces .....	374
Railings and Fences .....	374
Railings .....	375
Sub-elements and Principles of the Railing Element .....	378
Railing Construction .....	380
Setting Up Rail Structure .....	380
The Bottom Line .....	393
<b>Chapter 12 • Presenting Your Design .....</b>	<b>395</b>
Drawings with Shadows .....	395
Analytical Drawings: Sun and Shadow Studies .....	397
Expressive Drawings with Shadows .....	399
Performance .....	401
Color-Coded Plans and Sections .....	401
Color Fill Schemes .....	402
Creating Presentation Plans and Sections .....	405
Elevations That Convey Depth .....	408
Linework .....	408
Drafting Lines .....	409
True-Color Elevations .....	410
Elevations with Transparent Materials .....	411
Using Images in Elevation Views .....	411
Working with Perspective Views .....	412
Silhouetted Edge Display .....	414
Rendering .....	415
The Rendering Design Bar .....	416
Materials .....	419
Raytracing the View .....	422
Rendering Best Practices .....	423

Creating Animated Walkthroughs .....	423
Exporting to Other Formats .....	424
The Bottom Line .....	425
<b>Chapter 13 • Fine-Tuning Your Preliminary Design .....</b>	<b>427</b>
Preliminary Design Tools .....	427
The Foundation Model .....	427
Calculating Areas .....	429
Room Tags .....	429
Area Plans .....	430
Making a Rentable Area Plan .....	433
Adding Areas and Tags .....	436
Schedules .....	437
Making a Simple Schedule (Rentable Area) .....	439
Placing the Schedule on a Sheet .....	443
Additional Schedule Capabilities .....	445
Using Schedules for Preliminary Cost Estimates .....	446
Editing the Graphic Appearance of a Schedule .....	448
The Bottom Line .....	449
<b>Chapter 14 • Evaluating Your Preliminary Design: Sustainability .....</b>	<b>451</b>
Sustainability in Architecture .....	451
Preliminary Design Tools .....	452
The LEED Rating System .....	452
Sun Studies .....	452
Tracking Recycled Materials .....	463
Window Surface Percentage vs. Room Area .....	465
Energy Analysis .....	466
IES <VE> .....	467
gbXML .....	467
Green Building Studio .....	468
The Bottom Line .....	469
<b>Chapter 15 • Annotating Your Model .....</b>	<b>471</b>
Annotating Your Views .....	471
Displaying Information about Rooms .....	472
Placing and Tagging Rooms .....	472
Room Separation Lines .....	475
Selecting Rooms .....	476
Rooms in Section Views .....	478
Room Properties .....	478
Room Area and Volume .....	479
Schedule Keys .....	481
Creating a Schedule Key .....	481
Tags .....	484
Loading Tags .....	485
Placing Tags .....	485
Changing a Tag Value .....	486
Tagging Untagged Elements .....	486

Shared Parameters .....	489
Creating a Custom Project Parameter .....	489
Creating Shared Parameters .....	491
Shared Parameter Notes and Cautions .....	501
Text and Keynotes .....	502
Text .....	502
Keynotes and Textnotes .....	503
Keynote Behavior and Editing .....	504
Keynote Filenaming Conventions .....	505
Keynote Settings .....	505
Adding Keynotes to a View .....	506
Keynote Legends .....	507
The Keynote Family .....	508
Predefining Keynotes .....	512
The Bottom Line .....	513
<b>Chapter 16 • Developing the Design with Smart Workflows .....</b>	<b>515</b>
Working with Repetitive Elements .....	515
Groups .....	516
Using Groups for Repetitive Rooms .....	516
Creating and Managing Groups .....	517
Creating and Placing Repetitive Units Using Groups .....	517
Adding Rooms to a Group .....	521
Nesting a Group into Another Group .....	523
Adding Detail Elements to Groups .....	524
Nesting a Group from a Previous Project .....	525
Making Variations to a Group Instance .....	525
Repeating Groups to Other Levels .....	528
Making the Group a Part of the Project .....	529
Editing a Group in a Separate File .....	531
Detail Groups .....	531
Best Practices for Grouping .....	532
Links .....	533
Common Link Use Cases .....	534
Linking Files .....	535
Special Link Features .....	536
Controlling the Visibility of Links .....	537
Groups, Links, or Both? .....	538
Final Considerations .....	539
The Bottom Line .....	539
<b>Chapter 17 • Moving from Design to Detailed Documentation .....</b>	<b>541</b>
Advancing the Design .....	541
Creating Drafting Views .....	541
Importing and Linking .....	542
Linking vs. Importing .....	543
Importing CAD Details .....	545
Detail Groups .....	547

Detail Components .....	548
Masking Regions .....	548
Creating a Repeating Detail Element .....	548
Detail Component Properties .....	550
Creating Custom Line Types Using Repeating Details .....	551
Miscellaneous Line Tools .....	552
Insulation .....	552
Filled Region .....	553
Show Hidden Lines .....	554
Linework .....	555
Using Callouts .....	556
Adding Information to Your Details .....	557
Embellishing the Wall Section: The SIM (Similar) Condition .....	560
Embellishing the Wall Section: The Model Details .....	566
General Tips for Detailing .....	578
The Bottom Line .....	579
<b>Chapter 18 • Advanced Detailing Techniques .....</b>	<b>581</b>
Creating 3D Details .....	581
Enabling a Section Box in 3D View .....	583
The Second Technique: Orienting to View .....	584
Adding Annotations to the 3D Detail .....	585
Embedding Details within Families .....	586
Visibility Settings .....	591
Adding Additional Information Using Symbolic Lines .....	592
Reusing Details from Other Revit Projects .....	594
Exporting Details from Revit Projects .....	594
Importing Views into Revit Projects .....	595
The Bottom Line .....	599
<b>Chapter 19 • Tracking Changes in Your Model .....</b>	<b>601</b>
Adding Revisions to Your Project .....	601
Placing Revision Clouds .....	603
Tagging a Revision Cloud .....	606
Parametric Modeling and Supplemental Drawings .....	607
Using Autodesk Design Review .....	607
The Design Review User Interface .....	609
Publishing to Design Review .....	610
Marking Up the Model Using Design Review .....	613
Importing a Design Review Markup .....	614
The Bottom Line .....	615
<b>Chapter 20 • Worksharing .....</b>	<b>617</b>
Worksharing Using the Workset Methodology .....	617
Worksharing Basics .....	619
Workset Organization .....	621
Moving Elements between Worksets .....	623

Workflow .....	625
Making a Central File .....	626
Making the Local File .....	626
Saving Shared Work .....	627
Loading Work from Other Team Members .....	628
Element Ownership .....	628
Borrowing Elements .....	629
Requesting Permission .....	629
Granting Permission .....	630
The Bottom Line .....	632
<b>Chapter 21 • Troubleshooting and Optimizing Tips .....</b>	<b>635</b>
Performance .....	635
Best Practices .....	637
File Corruption .....	642
Tips for Getting Started in Revit .....	643
Additional Resources .....	645
The Bottom Line .....	646
<b>Appendix A • The Bottom Line .....</b>	<b>647</b>
<i>Index</i> .....	667
