## Environmental Benefits Statement

This book is printed with soy-based inks on presses with VOC levels that are lower than the standard for the printing industry. The paper, Rolland Enviro 100, is manufactured by Cascades Fine Paper Group and is made from 100 percent post-consumer, de-inked fiber, without chlorine. According to the manufacturer, the following resources were saved by using Rolland Enviro 100 for this book:

Mature trees	Waterborne waste not created	Water flow saved (in gallons)	Atmospheric emissions eliminated	Energy not consumed	Natural gas saved by using biogas
225	103,500 lbs.	153,000	21,470 lbs.	259 million BTU	37,170 cubic feet
